

# Lawler Temflow 9700 Single Filter Water Management Systems

Panel dimensions: 18"H by 24"W.

The Lawler Temflow single filter system is equipped with Lawler series 9700 double stage mixing valve with a combination stop and check valve on each inlet. The blended water outlet includes a volume control, a vacuum breaker, dial thermometer, a poly or stainless steel filter, and two convenient  $\frac{3}{4}$ " hose connectors. It is furnished completely assembled with your choice of finish and securely mounted on an attractive, easy to clean panel.

## MIXING VALVE

**SERIES 9700** – The mixing valve shall be combination pressure-balanced and thermostatically-controlled with sliding parts of stainless steel and actuated by a liquid-filled thermostat, all contained in one compact body. The mixing valve shall be adjustable between all cold and 105°F temperatures unless otherwise specified.
